Notes:

- Parents are always encouraged to read books aloud that are 1-2 grade levels above their student's current grade level.
- Lexile categories are only one measure for appropriateness. Please note that book length is important to consider as well as a child's interest. You can also always give a child a book that has a lower Lexile category than the one they are in. In fact, don't skip any of the literature listed above! It can just be considered a joy read if it is "easy."
- Use the Lexile website for more titles on your student's level, though we cannot verify content appropriateness if they are not on the above list. ([Find A Book | Lexile & Quantile Hub](#))
- Encourage students to keep track of their reading records and reflect on their reading.
